During the design of the Public Library Development Program by the New Standards Task Force of the Public Library Association, it was immediately evident that any planning process for individual public libraries would be aided by the availability of current statistics from other public libraries. The process of gathering of statistics of public libraries in the United States has been somewhat haphazard, with some annual statistics reported to state library agencies, periodic questionnaires by the U.S. Department of Education, and some reports emanating from the Urban Libraries Council and the Allen County Public Library. As a result, the Task Force determined that the Public Library Association should start collecting needed statistics from at least a sample of American and Canadian public libraries, including all those serving populations over 100,000, as soon as possible.

With financial contributions from over 120 individual libraries and state library agencies funding the Public Library Development Program, resources were made available to create the Public Library Data Service. The concept of the Data Service was outlined by the PLDP study team, headed by Charles McClure, and details were developed by Mary Jo Lynch, a member of the study team charged with this special task.

A PLA special committee, the Public Library Data Service Advisory Committee, was appointed by the President of PLA, Kathleen Balcom, and this committee assisted PLA staff in the initial task of sending the PLDS questionnaire developed by Mary Jo Lynch to over 600 public libraries, tabulating results and preparing the first PLDS product, this publication.

Based on the very popular and successful biannual statistical report issued for some years by the Allen County Public Library and also including some elements of the biannual report of the Urban Libraries Council, this report is designed to meet the demands of those for whom those reports became essential. As well, the Data Service will publish the publication on an annual basis, expanding its coverage to smaller libraries (and eventually to a statistically valid sample of American public libraries), and intends to offer in the near future custom searches of its statistical data base to individual libraries on a request basis.

The Public Library Association is grateful to the many individuals and institutions who have contributed to the initial publication of the Public Library Data Service and its establishment as a continuing service to the profession by PLA:

- The contributors to the Public Library Development Program
- The study team for PLDP, especially Mary Jo Lynch
- The members of the Public Library Data Service Advisory Committee: Charles Robinson (Chair), Ronald Dubberly, Marianne K. Cassell, Janice Feye-Stukas, Jeffrey Krull, Nancy Bolt, Don Napoli, Keith Doms
- The Urban Libraries Council and the Allen County Public Library, without whose expertise, experience and cooperation this effort would have been much more difficult
- ALA Publishing Services and the staff of the Baltimore County Public Library,for vital help in preparing printed forms and this publication for PLA
- The individual public libraries which filled in the questionnaire, contributing their essential information to an entity which will be of use to all their colleagues in the profession
- And very significantly, that Prince of the Personal Computer and Master of the Macintosh, Don Napoli, Director of the South Bend (IN) Public Library, and his capable staff, who prepared all the statistical tables from the raw data sent to him by PLA, and who will continue to advise PLA staff as they take over this function in years to come.

The Public Library Association's objective in establishing the Public Library Data Service, of which this publication is the first product, is the improvement and facilitation of management planning in American public libraries. We hope that it will be not only of use to you, but that your support and suggestions will improve, expand and initiate additional services by the Data Service in the future.

About this Report

Scope

With the cooperation and support of the Urban Libraries Council and the Allen County (IN) Public Library, the following groups of public libraries were invited to respond to the first annual Public Library Data Service Questionnaire:

- All public libraries serving populations of 100,000 or more previously included in the report, "Statistics of Public Libraries in the United States and Canada Serving 100,000 Population or More" published by the Allen County Public Library
- All public libraries participating in statistical reporting for the Urban Libraries Council
- All public libraries which contributed to the Public Library Development Project
- Any other public libraries requesting inclusion

Timing

Data were collected between February 1 and March 30, 1988 and reflect information available from the most recent fiscal year of each reporting library.

Accuracy

"What you see is what we got." A guiding principle of this publication is to provide fast turnaround for the profession of data received from the profession. No attempts were made by PLA to correct or to externally verify any data as that would have delayed publication of the report. If the numbers reported for any library seem troublesome to you, please contact the person listed in Section I as having completed the questionnaire.

Arrangement

Section I lists all responding libraries alphabetically by the name of the library. It also lists the population of the legal service area for the library. All subsequent sections are arranged by size of the population of the legal service area. Section I may therefore be used as a location tool to determine where to look for data from any specific library in the following sections.

Frequency

This report will be issued annually by the Public Library Association with data collected each January through March from participating libraries. See the response form in this book for additional details.

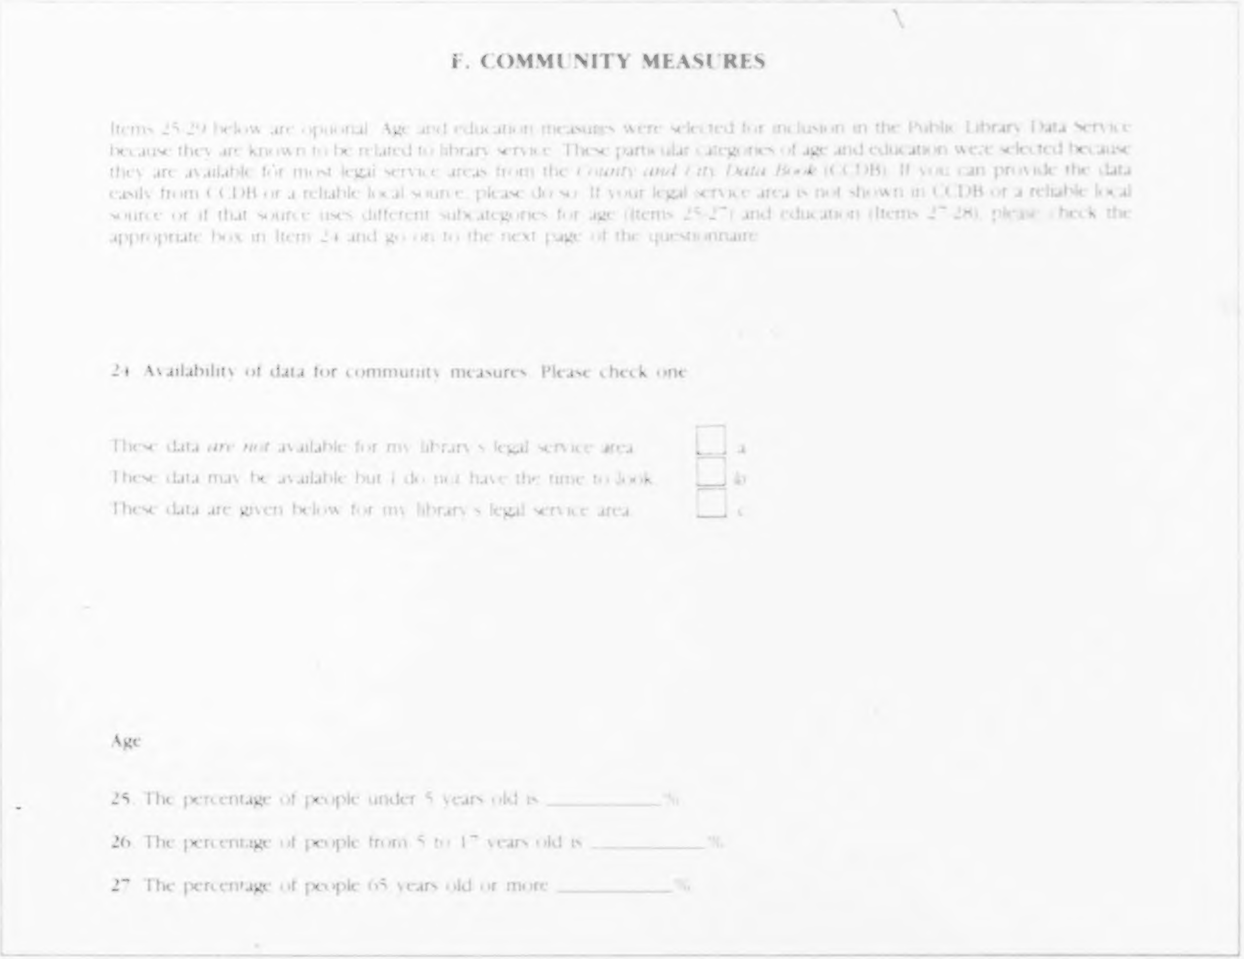
III. Library Resources and Community Measures



F. COMMUNITY MEASURES

Items 25-29 below are optional. Age and education measures were selected for inclusion in the Public Library Data Service because they are known to be related to library service. These particular categories of age and education were selected because they are available for most legal service areas from the *County and City Data Book* (CCDB). If you can provide the data easily from CCDB or a reliable local source, please do so. If your legal service area is not shown in CCDB or a reliable local source or if that source uses different subcategories for age (Items 25-27) and education (Items 27-28), please check the appropriate box in Item 24 and go on to the next page of the questionnaire.

24. Availability of data for community measures. Please check one.

These data *are not* available for my library's legal service area ☐ a
These data may be available but I do not have the time to look ☐ b
These data are given below for my library's legal service area ☐ c

Age

25. The percentage of people under 5 years old is ___________%

26. The percentage of people from 5 to 17 years old is ___________%

27. The percentage of people 65 years old or more ___________%

Data reported in this section are arranged by size of population served, in descending order from the highest to the lowest. If size of population served is unknown for a specific library about which information is desired, consult Section I, Library Identification, where libraries are listed in alphabetical order.

Responses to the following questionnaire items are represented in the Library Resources and Community Measures tables.

Education

28. The percentage of people 25 years old and over who have completed 12 years or more of school is ____________%.

29. The percentage of people 25 years old and over who have completed 16 years or more of school is ____________%.

C. STAFF (FULL-TIME EQUIVALENT)

Report figures as of the last day of the fiscal year. Include unfilled positions if a search is currently underway. Report FTE in terms of your standard work week as long as that standard week is between 35 and 40 hours.

11. **Librarians.** Report FTE of all who are: Staff members doing work that requires professional training and skill in the theoretical or scientific aspect of library work, or both, as distinct from its mechanical or clerical aspect. The usual educational requirement is a master's degree (or its historical antecedent) from a library education program. Include staff in managerial positions as well as in other positions.

Number of librarians (FTE) ____________________

12. **All other paid staff.** Include all other persons paid by the library budget **EXCEPT** plant operations and maintenance staff. Include paraprofessionals, clerks, and professionals other than librarians.

Number of all other paid staff (FTE) ____ ______________

13. **Total paid staff (FTE).** Total of Items 11-12 ______________________

3. **Library registration.** Report this figure only if the library has purged its file at least once within *the last three years*. If not, indicate by putting N/A in the space. See Chapter 5 of OMPL2 for suggestions for determining this figure.

Library registrations ___ ______________

4. **Holdings.** For the purpose of this data service, holdings will be defined as in OMPL2: the number of cataloged items (number of items, **NOT** number of titles) plus paperbacks and videocassettes even if uncataloged. Do **NOT** include periodicals whether cataloged or uncataloged.

IV. Annual Use Figures

Please provide the latest data available regardless of fiscal year.

The data elements and output measures listed below are described in *Output Measures for Public Libraries* (OMPL). Page references are given to data collection procedures in the second edition of this work (OMPL2, ALA, 1987). It is expected that you have followed these procedures or those described in the first edition (ALA, 1982). For Items 30-34 report separate figures for the central library (if any) and for all branches as well as a total. If you do not have a central library, put N/A in the space. For Items 35-40 report for the library as a whole (i.e., the central library and all branches). If an item is not available, mark N/A in the space.

ANNUAL COUNTS

The following data elements are either exact counts or annual estimates based on counts taken on sample days according to procedures in OMPL. They will be used with population of legal service area to produce per capita measures.

	Central Library	Total for All Branches	Total
30. Annual circulation (OMPL2 p. 42-44)	________	________	________
31. Annual in-library materials use (OMPL2 p. 44-47)	________	________	________
32. Annual reference transactions (OMPL2 p. 65-69)	________	________	________
33. Annual number of library visits (OMPL2 p. 37-41)	________	________	________
34. Annual program attendance (OMPL2 p. 71-72)	________	________	________

10. **Interlibrary loan.** An item of library material, or a copy of the material, is made available by one library to another upon request. It includes both lending and borrowing. The libraries involved in interlibrary loan are *not* under the same library administration.

a. Loans provided to other libraries ________________

b. Loans received from other libraries ________________

Data reported in this section are arranged by size of population served, in descending order from the highest to the lowest. If size of population served is unknown for a specific library about which information is desired, consult Section I, Library Identification, where libraries are listed in alphabetical order.

Responses to the following questionnaire items are represented in the Annual Use Figures tables.

V. Output Measures

G. OUTPUT MEASURES

Please provide the latest data available regardless of fiscal year.

The data elements and output measures listed below are described in *Output Measures for Public Libraries* (OMPL). Page references are given to data collection procedures in the second edition of this work (OMPL2, ALA, 1987). It is expected that you have followed these procedures or those described in the first edition (ALA, 1982). For Items 30-34 report separate figures for the central library (if any) and for all branches as well as a total. If you do not have a central library, put N/A in the space. For Items 35-40 report for the library as a whole (i.e., the central library and all branches). If an item is not available, mark N/A in the space.

PERCENTAGES

35. Reference completion rate (OMPL2 p. 69-72) ____________

36. Title fill rate (OMPL2 p. 50-62) ____________

37. Subject and author fill rate (OMPL2 p. 50-62) ____________

38. Browsers' fill rate (OMPL2 p. 50-62) ____________

39. Document delivery within 7 days (OMPL2 p. 62-65) ____________

40. Document delivery within 30 days (OMPL2 p. 62-65) ____________

H. LIBRARY ROLES

The roles listed below and a method for choosing among them are described in Chapter 4 of *Planning and Role Setting for Public Libraries* (ALA, 1987) (PRSPL). Please report on the status of role setting in your library by checking *one* of the options listed below.

Data reported in this section are arranged by size of population served, in descending order from the highest to the lowest. If size of population served is unknown for a specific library about which information is desired, consult Section I, Library Identification, where libraries are listed in alphabetical order.

The per capita figures in these tables were determined by dividing the following annual counts by the reported population of the library's legal service area:

- Circulation
- In-Library Use
- Visits
- Reference Transactions
- Holdings

The basis for the remaining figures is as follows:

Collection Turnover = Annual Circulation divided by library holdings.

41. Status of role setting.

We have not yet used PRSPL to select roles for our library. Skip to Section I **COMMENTS**. ____________ (a)

We used PRSPL to select roles but the ones we selected are different from the roles described in PRSPL. Skip to Section I **COMMENTS**. ____________ (b)

We used PRSPL and selected roles described there. Roles selected are marked below. ____________ (c)

42. For purposes of this questionnaire, we are interested in the roles your library selected using PRSPL. Mark each of your primary roles (but no more than two) with a "1" and each of your secondary roles (but no more than two) with a "2". Mark all other roles with a "3".

F. COMMUNITY MEASURES

Items 25-29 below are optional. Age and education measures were selected for inclusion in the Public Library Data Service because they are known to be related to library service. These particular categories of age and education were selected because they are available for most legal service areas from the *County and City Data Book* (CCDB). If you can provide the data easily from CCDB or a reliable local source, please do so. If your legal service area is not shown in CCDB or a reliable local source or if that source uses different subcategories for age (Items 25-27) and education (Items 27-28), please check the appropriate box in Item 24 and go on to the next page of the questionnaire.

24. Availability of data for community measures. Please check one.

It is expected that you have followed these procedures or those described in the first edition (ALA, 1982). For Items 30-34 report separate figures for the central library (if any) and for all branches as well as a total. If you do not have a central library, put N/A in the space. For Items 35-40 report for the library as a whole (i.e., the central library and all branches). If an item is not available, mark N/A in the space.

Appendix B

Data Coding Decision Guidelines

The following coding rules governed the transfer of data from returned questionnaires to the summaries contained in this report.

General Rules

1. If any item is redefined by the respondent on the questionnaire, enter NA or leave blank. We cannot annotate entries to document exceptions.
2. If two or more responses are entered in one blank, leave blank.

Statistical Rules

Procedures for determining low, high, median, quartiles, mean, and number reporting for a given field:

Values were arranged in ascending order.

The NUMBER REPORTING equals the number of nonzero values.

The LOW equals the first nonzero value in the squence.

The HIGH equals the last value in the sequence.

If the number reporting is greater than 5, determine the mean and the median.

The MEAN is the sum of all values divided by the NUMBER REPORTING.

The MEDIAN is the middle value in the sequence if there is an odd number of values; if the NUMBER REPORTING is an even number, the MEDIAN is the sum of the values divided by 2.

If the NUMBER REPORTING is greater than 5, then:

The LOWER QUARTILE (25%) is the number reporting divided by 4 and rounded to the nearest whole number to get x. The LOWER QUARTILE is the xth nonzero number in the sequence.

The UPPER QUARTILE (75%) is the number reporting divided by 4 and that number multiplied by 3; the result is rounded to the nearest whole number to get x. The UPPER QUARTILE is the xth nonzero number in the sequence.

Rules Regarding Specific Questions

1. *Fiscal year.* If stated fiscal year ends after the date the questionnaire is completed, assume a typo on the year. Enter earlier date.

11-13. *Staff.* Enter as given, including totals. Do not recompute if line 13 does not equal line 11 plus line 12.

14-23. *Financial Information* . Convert Canadian dollars to American based on one standard rate for the entire report. $1.24 Canadian to $1.00 is to be used.
Enter income and operating expenditures exactly as reported. Do not recompute even if totals are not sums of items as indicated.

30-34. *Annual Counts.* If no branch or central breakouts are given, report items only in "Total" column.
Total circulation - If number reported is more than the sum of the branch library circulation plus the central library circulation, report as given. If it is less, use the sum of the branch and central figures.

Scope of this Report

The following groups of public libraries were invited to respond to the second annual Public Library Data Service Questionnaire:

☐ All libraries which participated in the 1988 Public Library Data Service Statistical Report.

☐ All libraries previously included in statistical reports of the Urban Libraries Council or "Statistics of Public Libraries in the United States and Canada Serving 100,000 Population or More" previously published by the Allen County Public Library.

☐ A randomly selected group of 400 libraries serving populations of 100,000 or fewer.

☐ All public libraries which contributed to the Public Library Development Project.

☐ Any other public libraries requesting inclusion.

Data from libraries in these groups may not be in the following report if the library did not return the questionnaire or if it was returned to late for inclusion.

I. Library Identification

Data reported in this section are arranged alphabetically by the name of the library. Data in all other sections are arranged by size of population served. Use this section to determine the size of the population served by any reporting library.

Responses to these questionnaire items are represented in the Library Identification tables.

2. Population of legal service area. Report the number of people in the geographical area for which the public library has been established to offer services and from which (or on behalf of which) the library derives income plus any areas served under contract for which this library is the primary service provider. See Chapter 5 of Output Measures for Public Libraries, Second edition (ALA, 1987) (OMPL2), for suggestions regarding sources for this figure.

Population of legal service area ____________

5. **Central library.** The single unit library or the unit where the principal collections are kept and handled, also called Main Library. A library system may or may not have a central library. Some systems may have an administrative center which is separate from the principal collection and is not open to the public. This type of building should not be reported.

Do you have a central library? (circle one) Yes No

6. **Branch libraries.** Report number, using the following definition: Branch libraries are auxiliary units which have all of the following: (1) separate quarters, (2) a permanent basic collection of books, (3) a permanent paid staff, and (4) a regular schedule for opening to the public.

Number of branches ____________

7. **Bookmobiles.** Report number, using the following definition: A truck or van especially equipped to carry books and other library materials and serve as a traveling branch library. Count vehicles in use, not stops.

Data reported in this section are arranged by size of population served, in descending order from the highest to the lowest. If size of population served is unknown for a specific library about which information is desired, consult Section I, Library Identification, where libraries are listed in alphabetical order.

$$\text{Salaries as a percent of expenditures} = \frac{\text{Expenditures for salaries and wages}}{\text{Total operating expenditures}}$$

$$\text{Materials as a percent of expenditures} = \frac{\text{Expenditures for library materials}}{\text{Total operating expenditures}}$$

$$\text{Materials expenditures per capita} = \frac{\text{Expenditure for library materials}}{\text{Population of legal service area}}$$

Unless otherwise noted, all figures reported on this questionnaire should be accurate as of the end of the most recently completed fiscal year.

III. Library Resources and Community Measures

Data reported in this section are arranged by size of population served, in descending order from the highest to the lowest. If size of population served is unknown for a specific library about which information is desired, consult Section I, Library Identification, where libraries are listed in alphabetical order.

Responses to the following questionnaire items are represented in the Library Resources and Community Measures tables.

D. COMMUNITY MEASURES

Items 24-28 below are optional. Age and education measures were selected for inclusion in the Public Library Data Service because they are known to be related to library service. These particular categories of age and education were selected because they are available for most legal service areas from the County and City Data Book *(CCDB). If you can provide the data easily from CCDB or a reliable local source, please do so. If your legal service area is not shown in CCDB or a reliable local source or if that source uses different subcategories for age (Items 24-26) and education (Items 27-28), please check the appropriate box in Item 23 and go on to the next page of the questionnaire.*

23. Availability of data for community measures. Please check one.

These data are *not* available for my library's legal service area. a ☐

IV. Annual Use Figures

Data reported in this section are arranged by size of population served, in descending order from the highest to the lowest. If size of population served is unknown for a specific library about which information is desired, consult Section I, Library Identification, where libraries are listed in alphabetical order

Responses to the following questionnaire items are represented in the Annual Use Figures tables.

Please provide the latest data available regardless of fiscal year.

The data elements and output measures listed below are described in Output Measures for Public Libraries *(OMPL). Page references are given to data collection procedures in the second edition of this work (OMPL2, ALA, 1987). It is expected that you have followed these procedures or those described in the first edition (ALA, 1982). For Items 29-33 report separate figures for the central library (if any) and for all branches as well as a total. If you do not have a central library, put N/A in the space. For Items 34-39 report for the library as a whole (i.e., the central library and all branches). If an item is not available, mark N/A in the space.*

ANNUAL COUNTS

The following data elements are either exact counts or annual estimates based on counts taken on sample days according to procedures in OMPL. They will be used with population of legal service area to produce per capita measures.

	Central Library	Total for All Branches	Total
29. Annual circulation (OMPL2 p.42-44)	________	________	________
30. Annual in-library materials use (OMPL2 p.44-47)	________	________	________
31. Annual reference transactions (OMPL2 p.65-69)	________	________	________
32. Annual number of library visits (OMPL2 p.37-41)	________	________	________
33. Annual program attendance (OMPL2 p.71-72)	________	________	________

F. INTERLIBRARY LOAN

40. Interlibrary loan. An item of library material, or a copy of the material, is made available by one library to another upon request. It includes both lending and borrowing. The libraries involved in interlibrary loan are *not* under the same library administration.

a. Loans provided to other libraries ________

b. Loans received from other libraries ________

V. Output Measures

Data reported in this section are arranged by size of population served, in descending order from the highest to the lowest. If size of population served is unknown for a specific library about which information is desired, consult Section I, Library Identification, where libraries are listed in alphabetical order.

The per capita figures in these tables were determined by dividing the following annual counts by the reported population of the library's legal service area:

- Circulation
- In-Library Use
- Visits
- Reference Transactions
- Holdings

The basis for the remaining figures is as follows:

$$\text{Collection Turnover} = \frac{\text{Annual Circulation}}{\text{Library holdings}}$$

E. OUTPUT MEASURES

Please provide the latest data available regardless of fiscal year.

The data elements and output measures listed below are described in Output Measures for Public Libraries *(OMPL). Page references are given to data collection procedures in the second edition of this work (OMPL2, ALA, 1987). It is expected that you have followed these procedures or those described in the first edition (ALA, 1982). For Items 29-33 report separate figures for the central library (if any) and for all branches as well as a total. If you do not have a central library, put N/A in the space. For Items 34-39 report for the library as a whole (i.e., the central library and all branches). If an item is not available, mark N/A in the space.*

PERCENTAGES

G. LIBRARY ROLES

The roles listed below and a method for choosing among them are described in Chapter 4 of Planning and Role Setting for Public Libraries *(ALA, 1987) (PRSPL). Please report on the status of role setting in your library by checking* **ONE** *of the options listed below.*

41. Status of role setting.

We have not yet used PRSPL to select roles for our library.
Skip to Section H **COMMENTS.** (a) ____________

We used PRSPL to select roles but the ones we selected are different from the roles described in PRSPL. Skip to Section H **COMMENTS.** (b) ________

We used PRSPL and selected roles described there. Roles selected are marked below. (c) ________

42. **For purposes of this questionnaire, we are interested in the roles your library selected using PRSPL.** Mark each of your primary roles (but no more than two) with a "1" and each of your secondary roles (but no more than two) with a "2". Mark all other roles with a "3".

E. OUTPUT MEASURES

Please provide the latest data available regardless of fiscal year

The data elements and output measures listed below are described in Output Measures for Public Libraries (OMPL). Page references are given to data collection procedures in the second edition of this work (OMPL2, ALA, 1987). It is expected that you have followed these procedures or those described in the first edition (ALA, 1982). For Items 29-33 report separate figures for the central library (if any) and for all branches as well as a total. If you do not have a central library, put N/A in the space. For Items 34-39 report for the library as a whole (i.e., the central library and all branches). If an item is not available, mark N/A in the space.

ANNUAL COUNTS

The following data elements are either exact counts or annual estimates based on counts taken on sample days according to procedures in OMPL. They will be used with population of legal service area to produce per capita measures.

Do not include the value of any contributed services or the value of in-kind gifts and donations.

Other income $ ____________

17. **Total income.** Total of Items 13-16 $ ____________

D. COMMUNITY MEASURES

Items 24-28 below are optional. Age and education measures were selected for inclusion in the Public Library Data Service because they are known to be related to library service. These particular categories of age and education were selected because they are available for most legal service areas from the County and City Data Book (CCDB). If you can provide the data easily from CCDB or a reliable local source, please do so. If your legal service area is not shown in CCDB or a reliable local source or if that source uses different subcategories for age (Items 24-26) and education (Items 27-28), please check the appropriate box in Item 23 and go on to the next page of the questionnaire.

23. **Availability of data for community measures. Please check one.**

Appendix C- Data Coding Decision Guidelines

The following coding rules governed the transfer of data from returned questionnaires to the summaries contained in this report.

General Rules

1. If any item is redefined by the respondent on the questionnaire, enter NA or leave blank. We cannot annotate entries to document exceptions.
2. If two or more responses are entered in one blank, leave blank.

Statistical Rules

Procedures for determining low, high, median, quartiles, mean, and number reporting for a given field:

Values were arranged in ascending order.

The NUMBER REPORTING equals the number of nonzero values.

The LOW equals the first nonzero value in the sequence.

The HIGH equals the last value in the sequence.

If the number reporting is greater than 5, determine the mean and the median.

The MEAN is the sum of all values divided by the NUMBER REPORTING.

The MEDIAN is the middle value in the sequence if there is an odd number of values; if the NUMBER REPORTING is an even number, the MEDIAN is the sum of the values divided by 2.

If the NUMBER REPORTING is greater than 5, then:

The LOWER QUARTILE (25%) is the number reporting divided by 4 and rounded to the nearest whole number to get x. The LOWER QUARTILE is the xth nonzero number in the sequence.

The UPPER QUARTILE (75%) is the number reporting divided by 4 and that number multiplied by 3; the result is rounded to the nearest whole number to get x. The UPPER QUARTILE is the xth nonzero number in the sequence.

Rules Regarding Specific Questions

1. *Fiscal year.* If stated fiscal year ends after the date the questionnaire is completed, assume a typo on the year. Enter earlier date.
